

ESCAPE

By Staunch Development

Birds are beautiful, strong yet fragile creatures. They vary among breeds but most share one thing in common which is migration.

When birds lack resources they migrate, similar to the Lebanese people's behavior. Since they feel entrapped with chaos, surrounded by sewage; water and electricity shortage, they flee abroad.

Escape gives the Lebanese a chance to experience the lifestyle they have always dreamt of without leaving their nest, right here at the pearl of the Lebanese coast. We no longer have to Escape away from home, rather, escape becomes home.

Escape is a village, based on a utopic vision, where everything we are missing in Lebanon is present behind its fences; from 24/7 electricity, water & security services, to serenity, calmness, an ecofriendly environment
